

Magnolia[®] Health Plan

gives you *more!*

With Magnolia, you will receive the same benefits you have with Medicaid **+MORE!**

Magnolia is a Coordinated Care Organization (CCO) whose number one priority is to promote healthy lifestyles for Mississippians. As part of the MississippiCAN program, we will serve selected Medicaid populations which include people who are aged, blind and disabled, children in foster care, and women who have breast or cervical cancer.

We are committed to preventative healthcare and work with your doctors to ensure Magnolia members receive the right care, at the right time, in the right place.

Incentives for Healthy Behaviors!

CentAccount[®]

This is a program that provides dollar rewards loaded to a **prepaid MasterCard[®]**. You earn rewards by completing easy healthy behaviors such as:

- Visiting your doctor within 90 days of becoming a member
- Filling out a Health Risk Screening form
- Going to an annual breast cancer screening
- And more!

You can use these rewards at stores and pharmacies that accept MasterCard for health-related items such as over the counter medicines.

Enhanced Vision for Adults

We cover an annual eye exam. Magnolia members can also get one pair of eyeglasses every 12 months.

NurseWise[®]

A **free** health information line! NurseWise is a staff of registered nurses who are on call 24 hours a day, 365 days a year. Our nurses can give advice on any of your health-related questions. You can save time by allowing NurseWise to help you determine just the right treatment — routine or emergency — to meet your healthcare needs. They can also answer questions about:

- Your health
- Making an appointment with your Doctor
- Administering medications
- Diabetes and other health conditions
- And more!

Disease Management

Members will have access to services that give information and support for complex health conditions such as asthma, congestive heart failure, diabetes, hypertension and obesity.

In-Home Tele-monitoring

Eligible members get devices to help check on their health problems at home. Some examples of these devices are: a Pulse Oximeter to check oxygen levels, a Blood Pressure Monitor and a Glucometer to check blood sugar levels.

MemberConnections®

Make your transition to MississippiCAN a breeze by using our MemberConnections program. Available by phone or even a visit to your house, our representatives can help you by providing you more information about:

- Your health benefits
- Access to services
- Counseling
- Assistance with transportation
- Choosing or changing doctors

Eligible members who do not have safe, reliable access to a telephone, are provided a cell phone through our Connections Plus®

program. This program allows our members to have 24-hour access to physicians, case managers, telehealth services and 911. When you qualify, a MemberConnections Representative comes to your home to teach you how to use the phone.
