Mississippi Medicaid

Jackson, MS – Governor Ronnie Musgrove released the following statement today regarding the Mississippi Medicaid program:

“The Mississippi Medicaid program is too important to the people of Mississippi. We must not let our children, our seniors, and the disabled live in fear that their basic health care needs will not be met. We are committed to finding a solution to this problem.

“I offered a viable plan for the Medicaid shortfall on January 25 without cutting services or access, without raising fees on the beneficiaries, and without taxing providers.”
