To complete the Governor's Computers in Classrooms Initiative by the end of this year, we need accurate data regarding the number of classrooms remaining without an Internet-accessible computer. On the server, you will find a spreadsheet in the Policy/Education/Classroom Technology Task Force Folder "Computer and Classroom Survey 2000".

Please update the school districts that have received and are scheduled to received computers during Phase 1-4. Please contact the remaining school districts and technology coordinators to update the list. You will be able to find each district's technology coordinator at <http://www.mde.k12.ms.us/oet/oetappr2.html>.

Please make contact with these coordinators by Friday, June 14.
