Per your request, I reviewed MDOT's 2001/2002 Statewide Transportation Improvement Plan (STIP). Federal Law requires that the Governor approve the STIP and MDOT had submitted a draft letter for the Governor's signature. The plan looks fine except for those items I've tagged: 1) 1998 data for the 1987 Four Lane Program – more recent data is available; and, 2) several typos which need to be corrected.

Please advise as to if we want to request the above changes be made prior to the Governor's letter or if we want to prepare letter for Governor's signature and send it back to MDOT for corrections to be made to document.
