

2003 Mississippi Women's Conference  
March 17, 2003

Women's Health Workshop  
Annette K. Low, MD

Objectives:

Most American women are unaware of the health issues that affect their lives and longevity. The workshop will update women on prevalent diseases they should know about (such as heart disease, diabetes and high blood pressure); how to minimize their health risks; and how to take charge of their health.
