A new analysis of trends in the reading and math assessments administered by  
the National Assessment of Educational Progress during the 1990s shows  
state-by-state performance on more than gains in the percentage of students  
at the proficient level or higher. For example, progress on math  
achievement has been steady in some states, but the gap between top readers  
and weak readers has increased in most states. Among those that show  
significant progress in both subjects are Connecticut, Mississippi, and  
North Carolina. Their stories point to the importance of long-term,  
consistent, and focused state policies directed at building the capacity of  
teachers and schools to improve student achievement. Check out the NEGP's  
MAY MONTHLY to find out more!

If your e-mail software cannot read attachments, you can read the May  
NEGP Monthly online at <http://www.negp.gov/issues/issu/monthly/0501.pdf>
