Governor Musgrove Presents Health Care Proposal To DeSoto County Audience

Hernando, MS – Governor Ronnie Musgrove presented his health care proposal to people attending today’s meeting, “Solutions for the Uninsured – Women and Children First,” at the DeSoto Civic Center.

“We have an opportunity here to make a difference in the health of all Mississippians,” Musgrove said. “It’s time for us to address the health care needs facing our people and make them a priority.”

Musgrove’s proposal calls for using a portion of annual tobacco payments to maximize federal dollars through Medicaid. Under his proposal, Musgrove wants to address health care needs such as diabetes, cancer and heart disease, as well as improving health insurance for state employees.
