

MDOT statement –

What do you think about the PEER report of MDOT?

The Leg. Is recommending appointed commissioners. What is your opinion on that?

The MDOT has a responsibility to manage our state roads efficiently and effectively. The quality of our highways has a direct effect on the image of our state, and our ability to sell Mississippi to business and industry considering us for new locations or expansions of their companies. We have the opportunity to consider a different management structure of MDOT. I am in agreement with the report and believe we should have appointed commissioners.
