

SENATE BILL 1663

BILL RENICK/COMMENTS

I don't like this bill. This bill would allow the PSC upon petition of a local government that runs a water system to build into the rates, money to pay for fire protection. As I read this bill they could pay for fire trucks, water tanks, water lines, fire hydrants, etc., I know that it would be a local entity petitioning but this could go too far. I understand, however, this is a recommendation of the Governor's water and sewer task force.
